

The HIPAA-safe analytics & automation platform

Every function below is powered by one governed AI brain — Martin.

GOVERNED & HIPAA-FIRST

ANALYTICS + AUTOMATION + AI

ONE PLATFORM

Governed Data Model

Your single source of truth — define each metric once and reuse it everywhere, so every report, dashboard and AI answer agrees.

- Metric Lab: governed metrics incl. ratios (rates, ROAS)
- Auto-model any warehouse table in one click
- Model health checks + auto-suggested joins

AI Analyst — “Ask”

Ask in plain English and get trustworthy answers. Martin only uses governed metrics, so it explains and forecasts but never invents a number.

- Natural-language Q&A grounded on your metrics
- Explain a change, find drivers, forecast ahead
- Works in-app and from Claude, ChatGPT & MCP

Reports & Dashboards

Best-in-class visualization with no SQL — build, format, share and export dashboards your whole team actually uses.

- Scatter, dual-axis, treemap, heatmap, maps & more
- Calculated fields, parameters, table calcs, drill-through
- Conditional formatting, share links, Excel/PDF export

Monitoring & Alerts

The platform watches your metrics around the clock and tells you what changed — before you have to ask.

- Automatic anomaly, trend, forecast & goal detection
- Plain-language digests to Slack & email
- Threshold alerts, annotations, activity feed, webhooks

Test & Learn

Prove what actually works with rigorous experimentation, then roll out the winners with confidence.

- A/B testing with CUPED variance reduction
- Incrementality via synthetic control + placebo
- Segment scans, driver analysis, rollout workflow

Automation Studio

A visual, drag-and-drop workflow builder that turns insight into action — our built-in answer to n8n.

- 600+ connectors: Slack, Teams, CRMs, HTTP & more
- AI agents with memory, branching, retries, sub-flows
- Describe a workflow in words — Martin builds it

Data Marketplace

Turn data you already own into a compliant, recurring revenue line.

- Governed catalog, bundles & secure delivery
- Licensing with revenue attribution
- Privacy-safe, de-identified peer benchmarks

Privacy & Compliance

Healthcare-grade guardrails baked into every layer, not bolted on afterward.

- De-identify-first (Datavant) before any AI sees data
- Row-level security, encryption, full audit log
- SOC 2 & HIPAA readiness · US-hosted · no model training

Connect Everything

Bring data in from anywhere and embed Martin's analytics into the tools your team already uses.

- 600+ connectors: warehouses, CRM, EHR, billing, web
- White-label embeds inside partner products
- Warehouse-native (BigQuery/Snowflake) — data stays put
