

SMART WITH

Martin

The HIPAA-safe analytics & automation platform for healthcare marketing - turn compliant first-party data into governed metrics, AI answers, forecasts, experiments, and automated action.

GOVERNED & HIPAA-FIRST

ANALYTICS + AUTOMATION + AI

One Platform

Replaces a BI tool + a workflow tool + a CDP analytics layer

Ask & get answers

Natural-language analytics grounded on trusted, governed metrics

Compliant by design

De-identify-first, row-level security, audit, US-hosted

Acts, not just reports

Automations turn insight into action automatically

WHAT THE PLATFORM DOES

Governed Data Model

One trusted definition of every number, built on your warehouse.

- Metric Lab: define once, reuse
- Auto-model a table in one click

AI Analyst (Ask)

Ask in plain English; the AI only uses governed metrics, so it can't invent numbers.

- 'What's our topline this quarter?'
- Explain a change; forecast

Reports & Dashboards

Build, format, share and export polished dashboards - no SQL required.

- Scatter, treemap, heatmap, maps
- Calculated fields & drill-through

Monitoring & Alerts

The platform watches your metrics and explains what changed - before you ask.

- Anomaly, trend & goal detection
- Digests to Slack / email

Test & Learn

Rigorous experimentation to prove what works and roll out winners.

- A/B tests with advanced stats
- Incrementality & synthetic control

Automation Studio

Visual drag-and-drop workflows that turn insight into action.

- Connect Slack, Teams, CRMs
- AI agents with memory in-flow

Data Marketplace

License governed, de-identified datasets - a compliant new revenue line.

- Catalog, bundles & delivery
- Licensing + revenue attribution

Privacy & Compliance

Healthcare-grade guardrails baked into every layer, not bolted on.

- De-identify-first before AI
- Row-level security + encryption

Connect Everything

Pull data from hundreds of sources; embed our analytics anywhere.

- 600+ data connectors
- White-label partner embeds

WHY IT'S DIFFERENT

Trustworthy AI

Grounded on governed metrics - it can explain and forecast, but it can't invent numbers.

Analytics + Action in one

Others buy a BI tool AND a workflow tool AND a data add-on. We deliver all three, governed.

Built for healthcare

Privacy is the foundation: de-identify-first, consent-aware, HIPAA-minded.
